# Practice piano at any time.

The high-end silent system  
for retrofitting in  
upright and grand pianos.

The new silent system by  
Excellent Piano Installs A. Dütz  
in Germany.

## Experience quality.

adsilent represents the cutting edge in the field of silent technology for retrofitting in grand and upright pianos.

- Superbe piano sound with 9 sample layers and 128 dynamic levels
- Also other new sound samples for e.g. Electric piano and strings
- 100% touch-less sensors for keys and pedals
- Integrated Bluetooth MIDI\*
- Max. 247 note polyphony
- 128 sounds
- Sound-effects (reverb, chorus, etc.)
- Metronome
- USB MIDI

\* Bluetooth MIDI feature currently only available for smart phones and tablet computers.

The silent system you have always been looking for.

New possibilities with adsilent in your piano:

**At home** - practice for yourself during the day or at night. Listen to your recordings or accompaniment instrument sounds via speakers.

**Digital recording** - You can record your performance and send it to your friends, relatives or teachers and also process it digitally.

**Control** - The system by pressing a button at the piano or directly from your smartphone via Bluetooth.

**At the music school** - several students can practice undisturbed at the same time in the same room. The piano teacher can plug in a second headphone and listen to a student's performance when needed.

**adsilent & player systems** - In combination with a player system (for example, PianoDisc iQ), you can also play your recordings live.
